

Establishment of the All-phased Earthquake and Tsunami Comparative Science for Disaster Risk Reduction

Genta Nakano, Yoshihiro Ito
Disaster Prevention Research Institute, Kyoto University,

Background

Kyoto University On-Site Laboratory “International Research Laboratory for Earthquake and Tsunami Risk Cognition and Reduction” has been established in the National Autonomous University of Mexico and its satellite in El Salvador University.

Objects

Disaster Prevention Research Institute conducts the all-phased earthquake and tsunami research in Mexico and El Salvador for years with the government funding (ex. SATREPS). The On-Site Laboratory further strengthens the international collaboration. Further involvement is highly appreciated.

Expectation from a future partner

Universities, governmental institutions, practitioners to pursue the multi-national, transdisciplinary and implementation science to reduce the risk along the Pacific coast.

Seeds and Needs

Making the feedback relationship among science, engineering and social science, and integrating the outcomes into the policies and practices for disaster risk reduction.
