United Kingdom Alliance for Disaster Research
Annual Conference

📍 University of Huddersfield
United Kingdom

📅 18 & 19 December 2023

ℹ️ ukadr2023.buildresilience.org
#ukadr2023

2030 and beyond:
Risk-informed decision making, investment and behaviour

Join us at the UK Alliance for Disaster Research (UKADR) Annual Conference 2023, a unique opportunity for the UKADR community to gather and advance disaster research. The conference theme, "2030 and beyond: Risk-informed decision making, investment, and behaviour," highlights the pressing need to address global challenges and manage disaster risks effectively.

The conference is inspired by the Mid-term Review of the Implementation of the Sendai Framework 2015-2030 (MTR SF), which emphasizes the importance of disaster risk management. While progress has been made since its implementation in 2015, our planet's increasing instability carries significant risks.

Be part of the discussions at the UKADR Annual Conference 2023 and contribute to shaping the future of risk-informed decision making, investment, and behaviour. Together, we can confront the challenges ahead and strive for a more resilient and sustainable world.

Organised by:
Global Disaster Resilience Centre,
School of Applied Sciences, University of Huddersfield, UK

University of HUDDERSFIELD
Inspiring global professionals

Call for Abstracts

We invite abstracts for oral and poster presentations at the symposium from case reports, concept notes, innovations, and original research. Conference themes include, but are not limited to:

Risk Governance and Management
- Risk governance and risk management architecture
- Transdisciplinary, prospective, and corrective risk reduction
- Stakeholder partnerships in disaster risk reduction
- The interface between science, policy, and practice

Financial Aspects of Disaster Risk
- Disaster risk finance
- Understanding the economics of disasters
- Business continuity planning

Interconnected Risks and Impacts
- Systemic, interconnected drivers of risks and cascading impacts
- Multi-hazard strategies and approaches

Vulnerability and Inequality
- Vulnerabilities, exposure, and inequality
- The whole of society's approach to DRR
- Social media information/ misinformation

Nature based Solutions and Environmental Resilience
- Nature-based and nature-inspired solutions
- Ecosystem resilience
- Natural resource management

Resilient Infrastructure and Built Environment
- Urban resilient systems
- Built environment and resilient infrastructure

Data and Information Systems
- Integrated data information systems
- Methods for risk identification, mapping, and reporting
- Early warning systems and preparedness planning

Community and Local Approaches
- Local Approaches and indigenous knowledge
- Building community resilience

Post Disaster Recovery and Reconstruction
- Sustainable post-disaster reconstruction
- Disaster-induced displacement

Climate Change Adaptation
- Climate change adaptation and disaster risk reduction nexus
- Climate change education

Important dates

Abstract submission opens	Abstract submission deadline	Abstract notification of acceptance
15th June 2023	**15th Sep 2023**	**15th Oct 2023**

Special features

- Posters and abstracts presentations
- Keynote speeches
- Panel discussions on selected topics
- Early career development pathways
- UKADR Annual General Meeting
- Networking session and drinks reception
